

Ensuring Quality.

Textile testing from Bönningheim to New Delhi, Dhaka to Hong Kong.

Our Focus: Your Success.

Take advantage of decades of experience for:

- Quicker product launches
- Assured product safety
- Tested quality

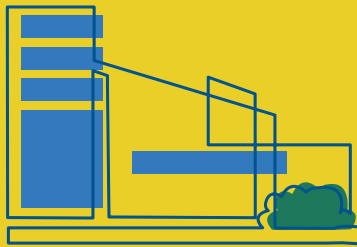

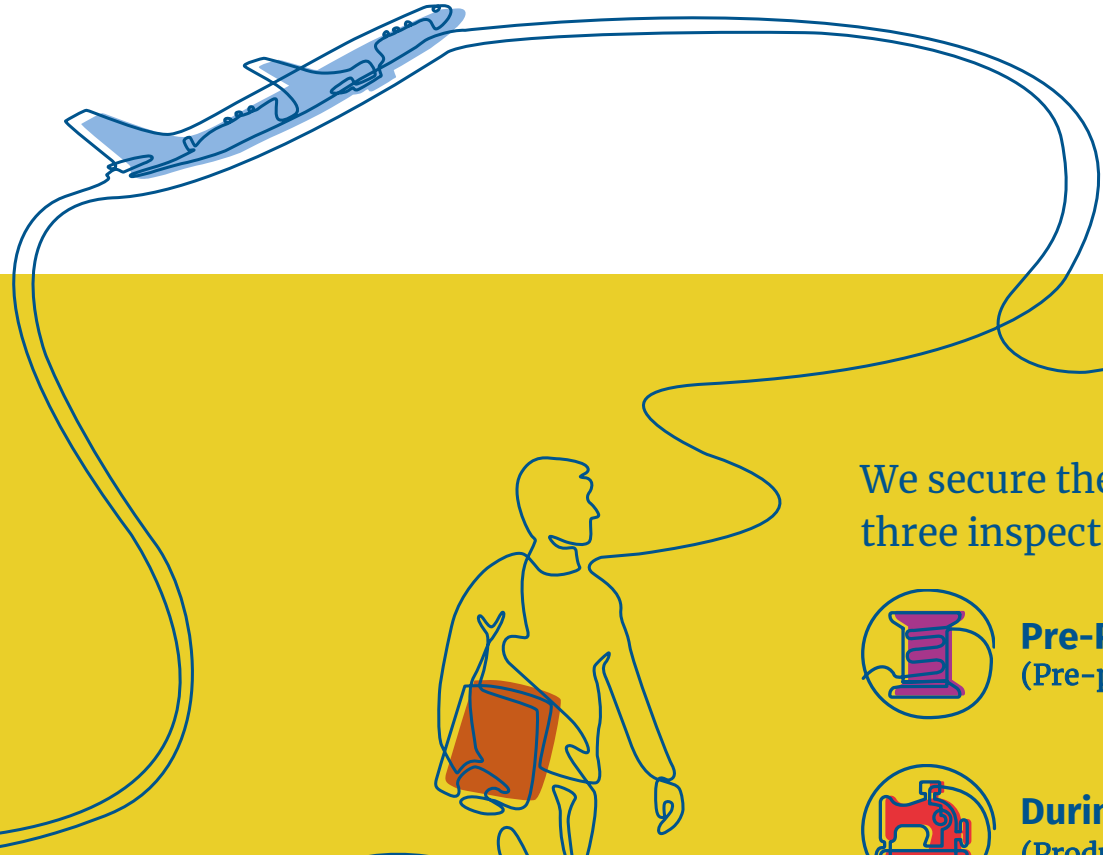

Many Locations- one standard.

- Internal laboratory comparisons – consistent results and quality
- ISO 17025 accreditation at each location
- Experts in each lab to interpret and explain test results
- A contact person in Germany or on-site, or both

On-Site Inspections.

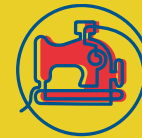

Hohenstein

We secure the quality of your product with three inspection modules:

Pre-Production Check
(Pre-production testing)

During-Production Check
(Production testing)

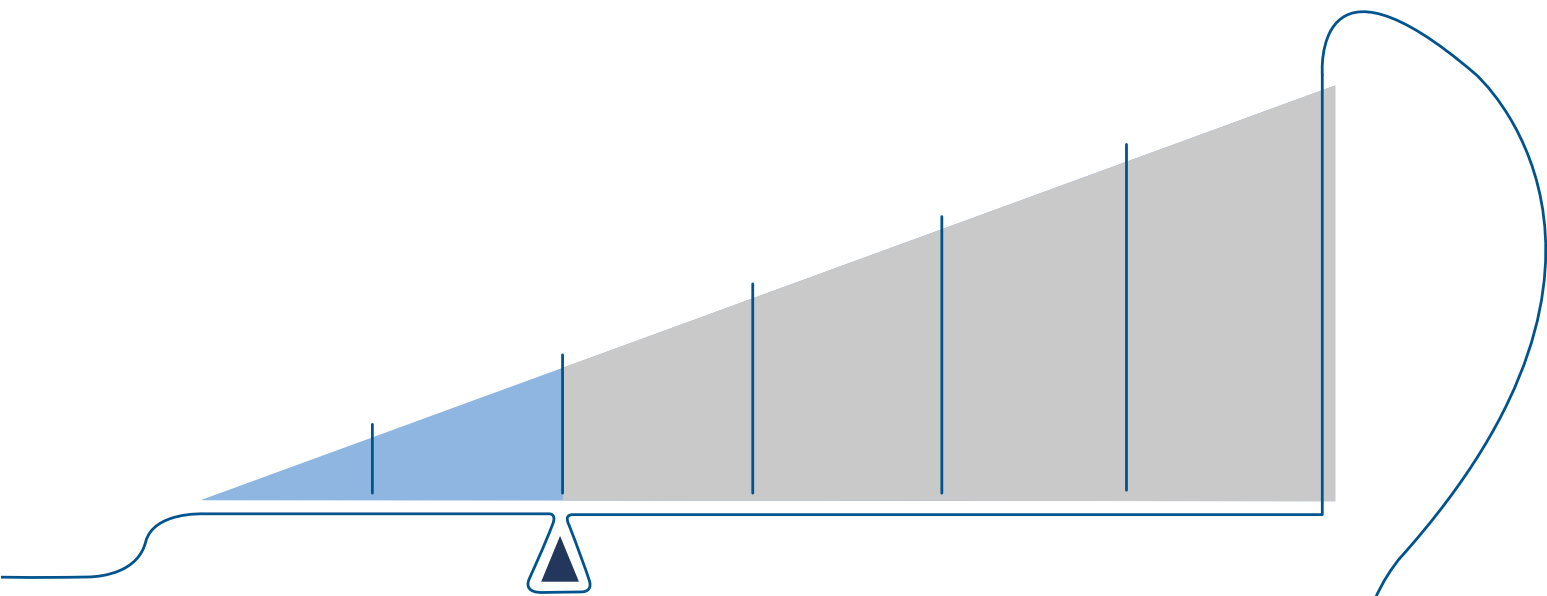

Final Random Check
(Final testing)

Tailored Testing. Create the Perfect Plan.

These are no off-the-shelf test plans.

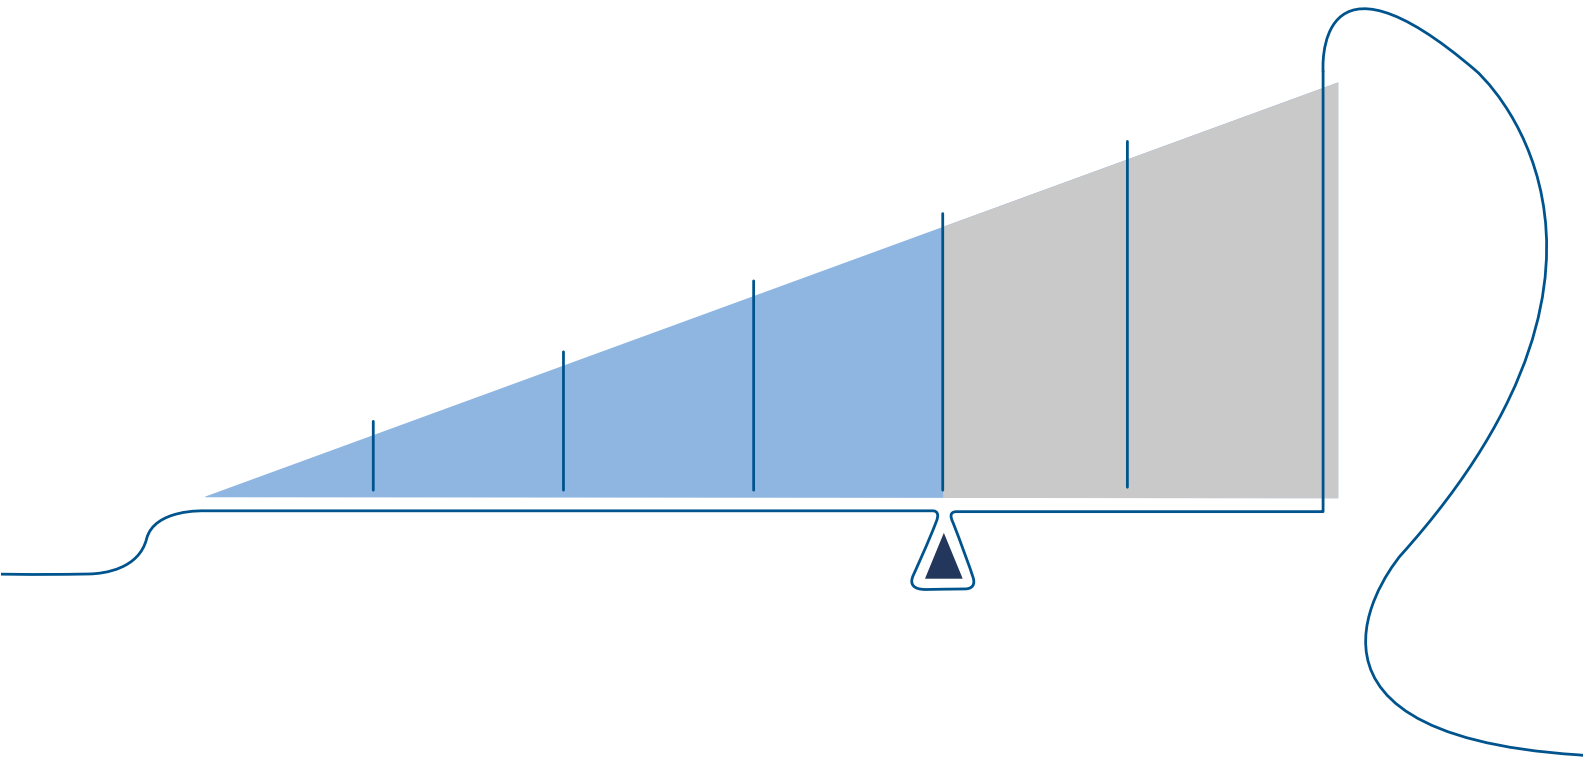

- Scope and depth of testing can be defined individually
- Tailored processes and communication

Legal protection.

Stay on the safe side of the law when you are:

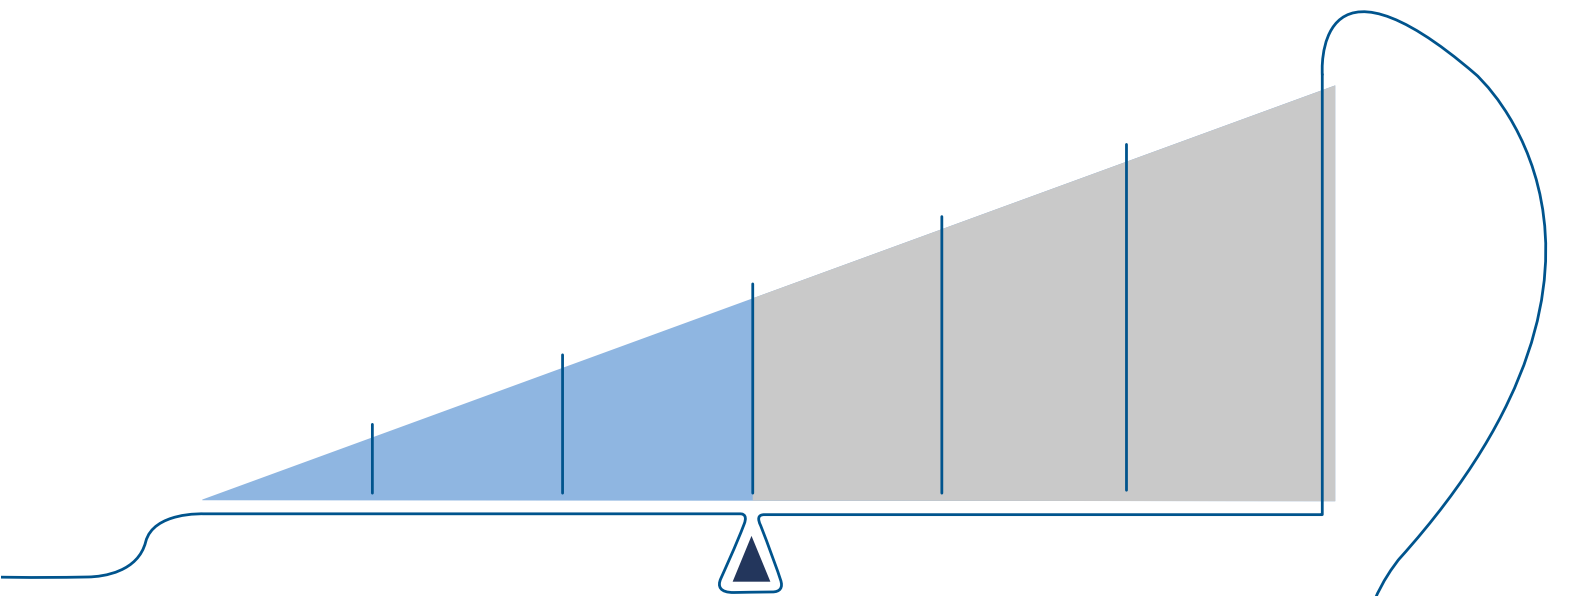

- Testing parameters for regulatory compliance
- Protecting product conformity

Quality communication.

Tests for qualities that:

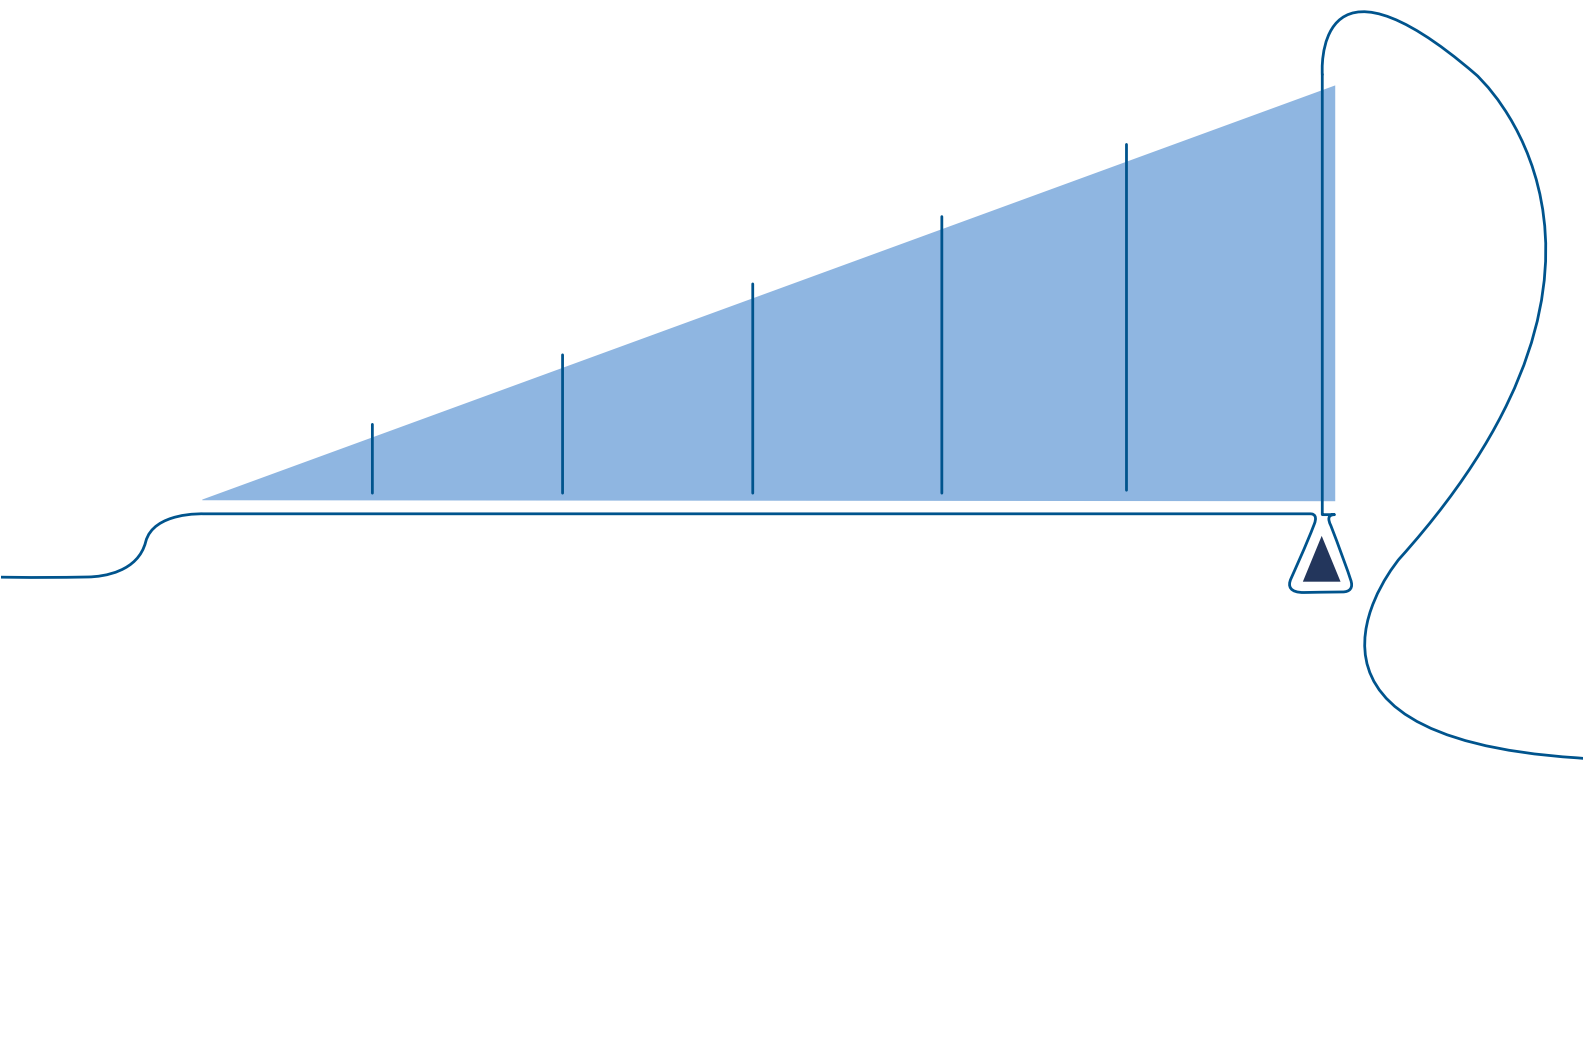

- exceed the standard
- are supported by initiatives and campaigns

Competitive advantage through claim verification.

Neutral proof through comparative product tests for:

- market definition
- demonstration of superior product quality

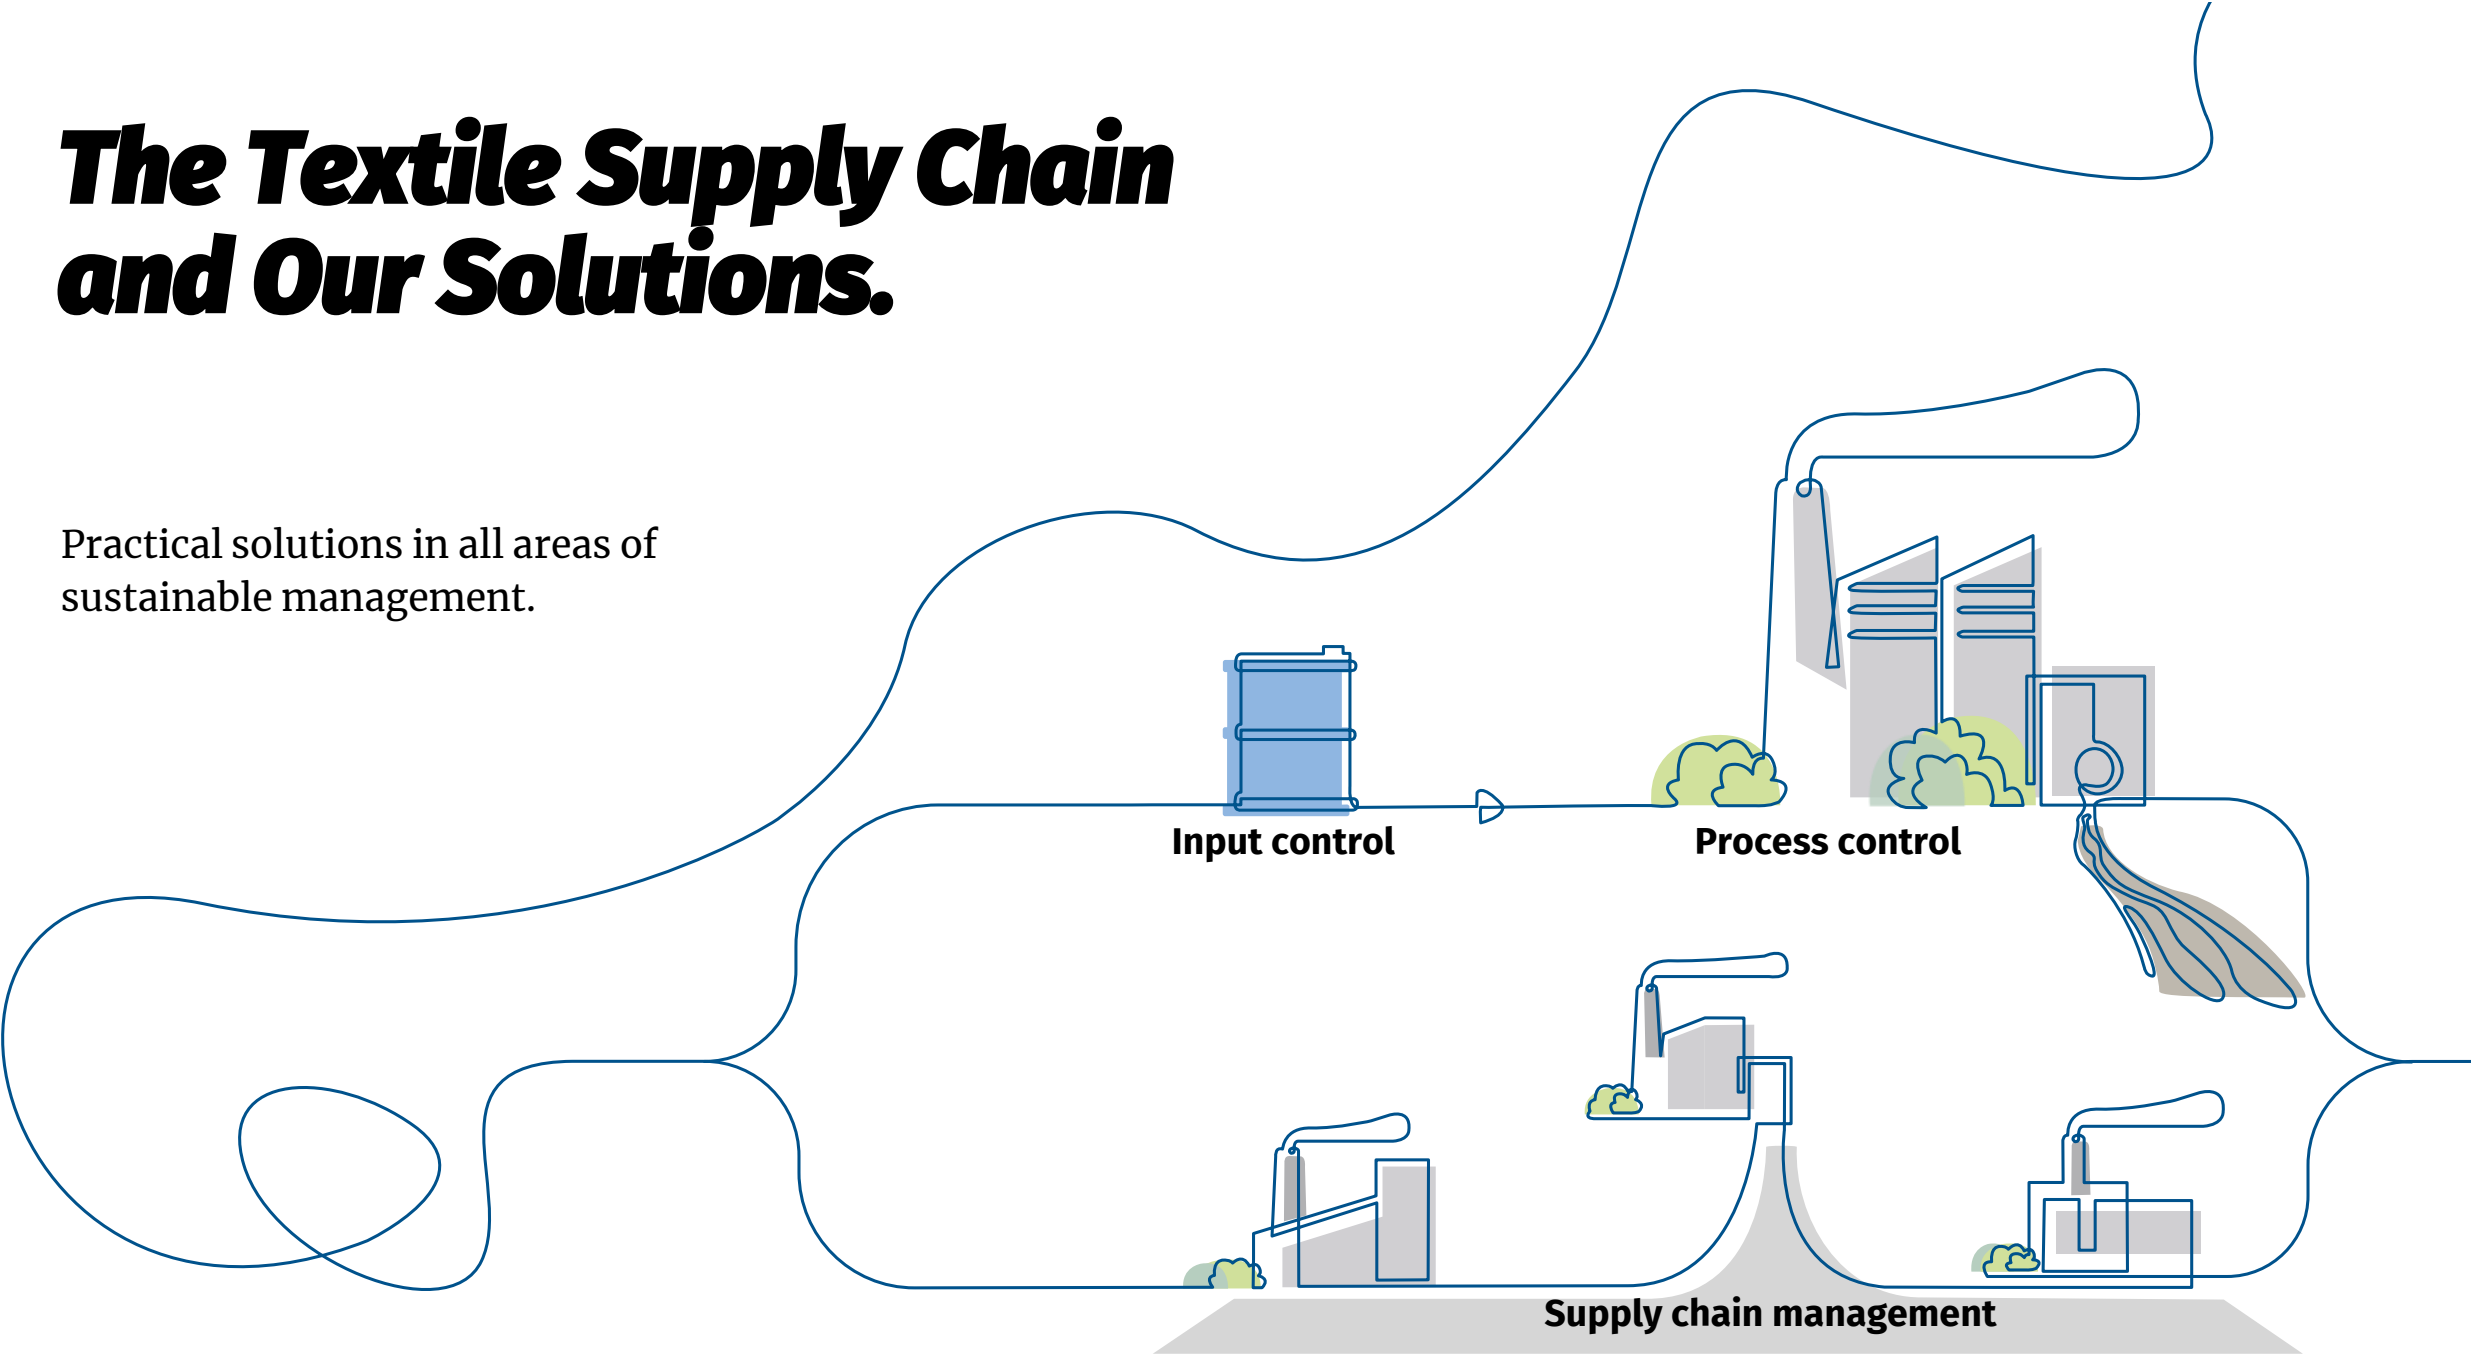

Everything from one source.

From a single test to complete procedure, we can find the perfect test plan for you.

The Textile Supply Chain and Our Solutions.

Practical solutions in all areas of sustainable management.

Visibly safe.

Textiles and leather products reach the market safe from harmful substances.

Be on the Safe Side.

Determination of conformity with:

- laws
- international standards
- internal quality guidelines

Textile technology testing

- Quality testing (e.g. colour fastness, fibre fineness, pilling)
- Performance testing (e.g. water proofing, water repellency, breathability)

Testing for chemicals and harmful substances

- Checking legal conformity and product requirements (e.g. tests for harmful substances per REACH, CPSIA and individual RSLs)
- Wastewater and sludge testing (ZDHC, OEKO-TEX®, Greenpeace)
- OEKO-TEX® certifications

Textile labelling and fibre composition

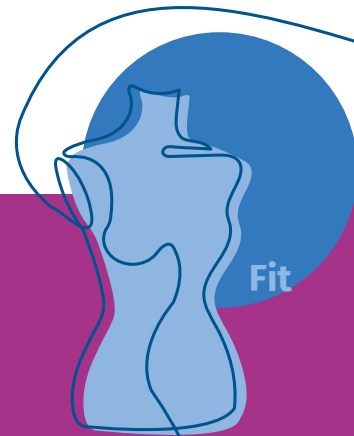

- Textile labelling: quantitative and qualitative determination of yarns and fabrics
- Microscopically, mechanical and chemical identification

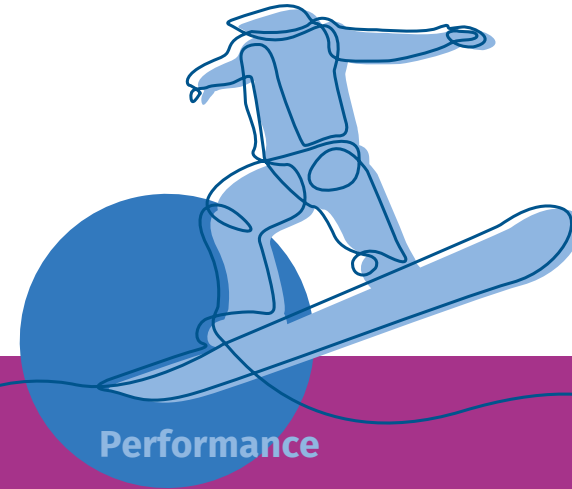

Testing Outside the Box.

We expand industry knowledge through:

- research
- knowledge transfer (seminars, workshops etc.)
